

## Ontrack Hosted Erase: simple, documented deletion

Centralised web management of all your deletion processes

Completed erasures of the connected computers and handheld devices are transmitted and recorded

No need for separate installation or operation of web servers or SQL databases

Simple online management of expired licenses without installation of HASP key or licence manager

Simple installation of Blancco erase software on the user machines to securely delete data from computers and mobile devices

Erase client supports Blancco Hard Drive Eraser and Blancco Mobile Eraser, the leading solutions for secure deletion

Simply select available erasure options through the erase client

Hosted Erase enables the simple execution and centralised management of all your erasure processes including detailed reports under a common web interface.

## Centrally manage user rights and licenses

Centralised administration, control and allocation of user rights

Administration and control of all used and available licenses

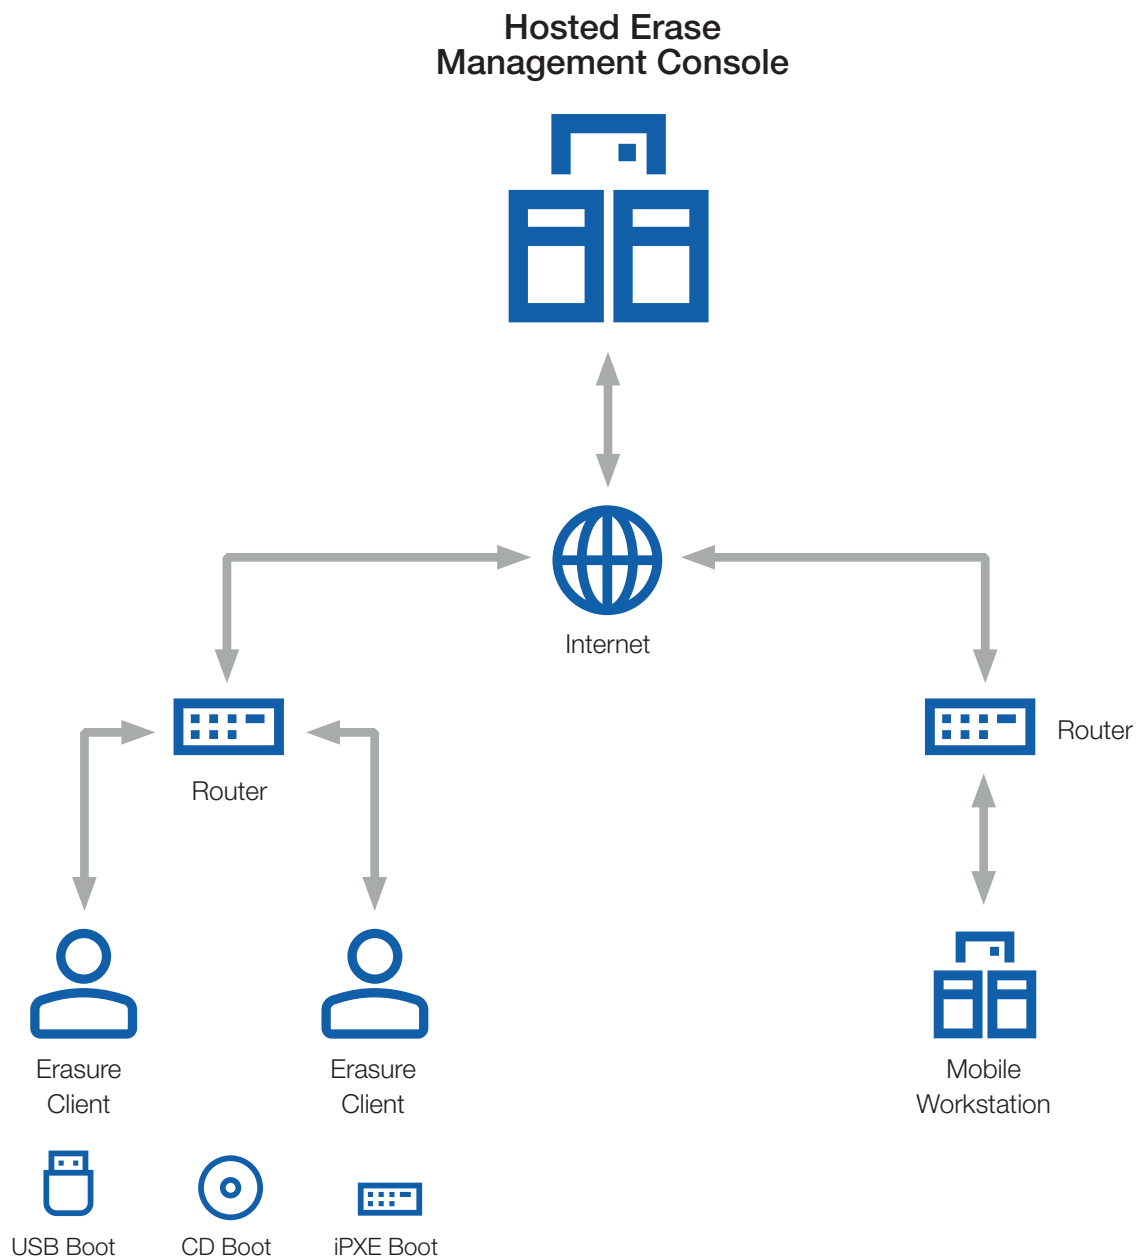

Purchased licenses are available for immediate use

## Comprehensive reporting of erasure processes

Management of all the reports for your completed erasures and their processes

Complete verification of proper erasure of all data in accordance with internal and external policies, laws and regulations

Reports can be saved as in CSV, PDF and XML format for further processing
